## TBPA Mission Statement

The mission of the Tennessee Backflow Prevention Association is to protect drinking water quality in the State of Tennessee by providing for education, statewide training, standardized certification, technical assistance and resources to our membership and the general public.

## President's Message

The 12th Annual TBPA Conference was a great success. I can't say enough good things about the two day event but to summarize: the attendance was good, the speakers were informative, the vendors were outstanding, the hotel was perfect and the food was some of the best in Tennessee. I can safely say "a good time was had by all." If you were unable to attend we will be looking for you at next year's conference.

The Board of Directors is looking forward to 2009 and we hope to accomplish great things with TBPA. A couple of the items we want to focus on are taking our message to more people in the state and helping our membership become more involved. We are one of the largest and most active chapters in the country

but we could be doing so much more. If you are looking for a place to serve, please let us know. You can begin by attending our Board Meeting on January 7, 2009 at Consolidated Utility in Murfreesboro at 11:00 a.m. Everyone is welcome.

Special congratulations to the recipients of this year's awards:

- Knoxville Utility Board - for their work in the field of backflow and promotion of TBPA.
- Kent Bowman - for his work within the TBPA organization.
- Keith Stephens - for his work within the backflow industry.

We are so proud to have individuals like these who are willing to give of their time and talents to work in the field of cross-connection and to further the goals of this association.

May each of you have a very Merry Christmas and a Happy New Year.

Larry Stinnett  
President TBPA

The Tennessee Backflow News is published quarterly by the Tennessee Backflow Prevention Association, whose members have a common interest in protecting the drinking water from contamination through cross connections. Your ideas, experience and expertise are invited and needed by the TBPA to insure a balanced approach to backflow prevention in the State of Tennessee. Your participation and support will continue to help shape the future of this industry in Tennessee.

Opinions expressed in articles, letters or advertisements in this publication are not necessarily those endorsed or supported by the TBPA. The content of this newsletter is not to be considered as legal or professional advice. **Dues are \$80 annually**, and are payable to the TBPA Treasurer. Annual dues include \$20 for Tennessee and \$60 for National ABPA dues. National membership is required for Tennessee membership.

## TBPA Classes

TBPA conducted an Administration and Survey Class on November 13th with several in attendance. We discussed the changes the state has been working on and where to find the state laws a water purveyor can use in their program. The class was informative with everyone learning something about having a successful cross connection program. The participants shared information about their individual programs, which I feel is a great part of the class. If you were not able to attend one of this year's classes, please make plans to be at the next class in 2009.

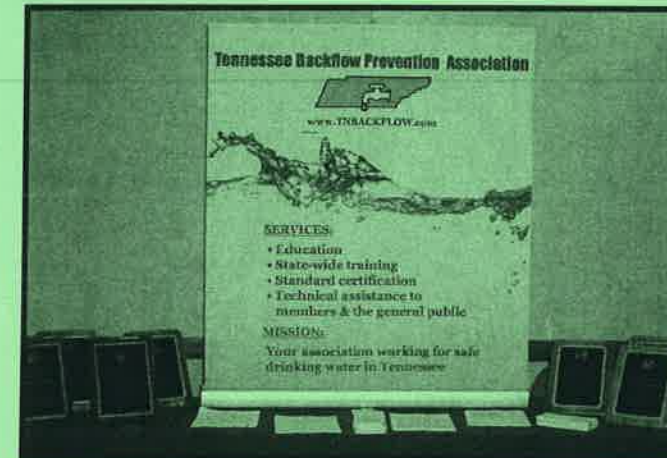

TBPA and Fox Sales will be having a repair class on December 11th and will cover the repair of Wilkins backflow devices and other Wilkins products that are used in cross connection programs for the protection of water systems.

We have 38 people signed up and are hoping for several walk-ins. We hope that everyone understands that these classes are not just for water purveyors, but are for everyone that deals with backflow devices and their repair.

Please help spread the word about these classes to plumbers, maintenance personnel, contractors and water purveyors who will be working with backflow devices. The classes are free and can be used for continuing education credits.

Please contact me at waynecook@blomand.net if you would like to be placed on our mailing list to be informed about all the up coming classes sponsored by TBPA.

# Backflow Prevention Assembly Repair Class & Administration and Survey Classes

**Who:** Tennessee Backflow Prevention Association  
**What:** 2009 Repair Classes & Administration and Survey Classes  
**When:** February 12, 2009 8:30-4:30 Repair Class - Wilkins  
**Where:** Fleming Training Center, 2022 Blanton Drive, Murfreesboro, TN 37129  
**Contact:** Kitty Banks at (423) 755-7605 or Wayne Cook at (931) 684-5998

## Some of the information presented:

- Double Check Valve Assemblies, Reduced Pressure Principle Assemblies, Vacuum Breakers
- Repair of varying device sizes from 3/4" to 4".
- Drawings and handouts available.
- Explanation of assemblies and parts used in repair
- Complete repair of devices and tools needed
- When to repair and when and what to replace
- Starting a Cross Connection Control Program
- Forms and documents for program administration
- Survey instructions and advice
- CD with all covered information
- Continuing Education Credits will be given

**Don't miss the opportunity to expand your knowledge on these valuable topics regarding CCC Programs and Assembly Repair.**

Classes are **FREE** but class size is limited and **registration is required**. Please use the registration form below, indicating the class, section location and date you wish to attend

## Administration & Survey Class and Repair Class REGISTRATION REQUIRED

**Only One Person and One Class per Registration Form**

Written registration is required for all classes. Complete the form below (printed or type written) and mail or fax to:

## TBPA Middle Section News

Here are some problems we have had in our area. You may have had the same situations, if not, please be on the alert.

Over the past few months at Consolidated Utility District a large number of backflow devices have been stolen from irrigation systems. In the process of stealing the device, the thieves are destroying the piping. This damage is costing our customers a great deal of money for repairs. Also, one of our local backflow testers had his vehicle vandalized and his backflow test kit stolen. Other areas have recently reported having hot boxes stolen.

It is believed that the stolen parts are possibly being installed in other areas as new backflows. The scrap yards have been checked for stolen parts but have yielded no results. We very much want to catch the people responsible for these acts. If you have any information concerning these thefts, please contact Consolidated Utility District at 615-893-7225.

I hope everyone had a Happy Thanksgiving and I wish you all a Merry Christmas and Happy New Year.

Randy Harrell  
Middle TN Director

## TBPA West Section News

Speak Up! Commentary

DW & RP Article - dated November 2008

*Plumbers do plumbing and as such are device workers/testers in accordance with the codes they must adhere to the following. Let's begin with some basic info and definitions.*

**Ref. IPC Chapter 6, Water Supply and Distribution Section 601 General**

601.1 Scope. This chapter shall govern the materials, design and installation of water supply systems, both hot and cold, for utilization in connection with human occupancy and habitation and shall govern the installation of individual water supply systems.

**Section 608, Protection of Potable Water Supply**

608.1 General. A potable water supply system shall be designed, installed and maintained in such a manner so as to prevent contamination from non-potable liquids, solids or gases being introduced into the potable water supply through cross connections or any other piping connections to the system. Backflow preventer applications shall conform to Table 608.1, except as specifically stated in Sections 608.2 through 608.16.9.

608.2 Plumbing fixtures. The supply lines or fittings for every plumbing fixture shall be installed so as to prevent backflow.

608.3 Devices, appurtenances, appliances and appa-

ratus. All devices, appurtenances, appliances and apparatus intended to serve some special function, such as sterilization, distillation, processing, cooling, or storage of ice or foods, and that connect to the water supply system, shall be provided with protection against backflow and contamination of the water supply system. Water pumps, filters, softeners, tanks and all other appliances and devices that handle or treat potable water shall be protected against contamination

The same is true for the UPC<sup>o</sup>, except that you must refer to the Definitions.

**Ref. Uniform Plumbing Code<sup>o</sup> Chapter 2, definitions**

201.0 General. For the purpose of this code, the following terms have the meanings indicated in this chapter. No attempt is made to define ordinary words which are used in accordance with their established dictionary meaning, except where a word has been used loosely and it is necessary to define its meaning as used in the code to avoid misunderstanding.

218.0 P. Plumbing - The business, trade, or work having to do with the installation, removal, alteration or of a plumbing system or parts thereof. The definitions of terms are arranged alphabetically according to the first word of the term.

Plumbing Appliances - Any one of a special class of devices or equipment which is intended to perform a special plumbing function. Its operation and/or control may be dependent upon one or more energized components, such as motors, controls, heating elements, or pressure - or temperature sensing elements. Such device or equipment may operate automatically through one or more of the following actions: a time cycle, a temperature range, a pressure range, a measured volume or weight; or the device or equipment may be manually adjusted or controlled by the operator.

Plumbing Appurtenance - A manufactured device, a prefabricated assembly, or an on-the-job assembly of component parts, which is an adjunct to the basic piping system and plumbing fixtures. An appurtenance demands no additional water supply, nor does it add any discharge load to a fixture or the drainage system. It performs some useful function in the operation, maintenance, servicing, economy, or safety of the plumbing system.

Device worker/testers are not necessarily plumbers and do not have the authority to petition for changes to the codes they do not recognize. We will cover installation in the next issue.

Lloyd Rainey  
West Section Director

# TBPA Board Meeting Update - October 1, 2008

Curtliss Davis - Region 3 Director

Bruce Rathburn - ABPA Vice President

Liba, Treasurer; Roger Crane with Backflow Control and Steve Beene, Past President.

Larry Stinnett, TBPA President, tries to give away a UT shirt.

Donna Morrell receives the award to KUB for their work in the field of backflow and promotion of TBPA.

Keith Stephens receives an award for work within the backflow industry.

Kent Bowman receives an award for his work with the TBPA

## Treasurer's Report

Balance \$17,521.72. This total includes the CD investment of \$5,100.00 for 7 months.

Welcome guests: Steve Betty, Joe Lewis, Mike Rucker, Steve McEwen, Brian Maxwell and Mike Burek

## By-Laws Changes

Angel passed out a copy of Resolution No. 5. The Resolution passed the final reading.

## TAUD Conference

It was agreed that participation in the TAUD conference was good for TBPA. We will consider it again in the future. It was decided not to advertise in the TAUD directory but to look at advertising in the TN Utility News.

## Web Page Redesign

Everyone is very happy with the look of the new TBPA web page.

## TBPA Awards Criteria

Criteria for awards were discussed and a committee formed to set up guidelines and qualifications for the recipients. They will bring information to the January Board Meeting.

## Conference Exhibitors

Pricing for conference exhibitors was discussed. Currently it is \$300 for members, \$320 if a member in another state (that provides TN membership), and \$370 if a non-member (that provides ABPA and TN membership for one year). Having only a member and non-member charge with no membership attached was discussed.

## Fleming Training Center

Fleming cancelled all training classes due to Brent Ogles and Travis Aslinger leaving State employment. Wayne will find out if we can sponsor and teach classes and continue to use the Fleming facility.

## USC Class

Wayne will pursue info on the classes in Tennessee. We would not be out any money only to provide a hotel, class site and three locations for surveys. In return we would receive two free slots to the class. We could give these as door prizes at the annual conference.

## West TN

Lloyd will pursue getting a repair class in West TN for Conbraco and Wilkins to host. He will also look at having the 2009 Conference in Memphis.

## Board Members

The Board voted to remove Travis Aslinger and Mike Trigg from the Directors-at-large positions on the board. Discussion was held on replacing them with another representative possibly someone from the State.

## Association Name Change

Liba will take care of the paperwork to officially change the name of the association to Tennessee Backflow Prevention Association. Previously named the Volunteer Chapter of ABPA.

## 2009 Board Meeting Dates - 11:00 at Consolidated in Murfreesboro, TN

## TBPA East Section News

The 2008 TBPA Annual Conference in Chattanooga on October 2nd and 3rd was again well attended. I had the opportunity to speak with several new members attending for the first time. The first timers, as well as others expressed how much they enjoyed the conference and learned from the speakers and vendors. The speakers were well informed and covered all areas of backflow. Once again, vendors were on hand to display their products and answer questions. We were pleased to see new vendors and hope to see them at the 2009 Conference.

I would personally like to say Thank You to all the speakers and vendors for their participation at the conference. Some traveled from different parts of the state and some even from out of state. Everyone realizes how difficult travel has been this year with the high gas prices and we appreciate their willingness to support TBPA.

Congratulations to this year's award winners: **Category 1** - Knoxville Utility Board (Donna Morrell). I have seen KUB's Cross Connection Program and have talked with them about issues and they are always willing to help others.

**Category 2** - Keith Stephens with Mid- America

Marketing in Nashville. I've known Keith since 2003 and he strives to attend every backflow class and conference held in Middle Tennessee, as well as traveling to other parts of the state. Those working in the backflow field in Middle Tennessee know Keith as the "go to guy" to help them with any issue.

Thanks also to Kitty Banks, Steve Betty, Steve Beene and Larry Stinnett for getting the Hotel, Food, Speakers and all the other little things that added up to make this year's Conference a success.

On November 12th the East Tennessee Section held a Wilkins repair class. Pat Ahearn and Johnnie Burns did a great job with all the Backflow Assemblies. They did break downs on the devices and showed the parts and repair kits for all the different models. They did an outstanding job answering everyone's questions about the Wilkins products. Thanks to Pat and Johnnie for the doughnuts at the break, the BBQ at lunch but especially for giving their time to help the TBPA with continuing education.

## Conference Vendors

TBPA would like to say THANK YOU to all our 2008 Conference Vendors. You are one of the main reasons our conference this year was such a success. As part of the registration fee, our vendors not only receive their name on the conference T-Shirt but they can also place an article about their company in the TBPA Newsletter. We encourage you to support the following vendors who give their time and resources to support TBPA and the backflow industry:

Aqua Shield - Ronnie Cox  
Backflow Control - Roger Crane  
Backflow Specialty, Inc. - Brad Stinnett  
Backflow Supply Sales, Inc. - Mark Truelove

## ABPA 2009

### Harrington/Arthur Memorial Scholarship

The ABPA is currently accepting applications for the 2009 Harrington / Arthur Memorial Scholarship. This scholarship is available to any high school student over 13 and under 20 years of age as of January 31, 2009. Additional rules and information may be found via [www.abpa.org](http://www.abpa.org).

An essay must be submitted based on the following required content: "Identify a cross connection in your home, school or place of business." and "Explore possible methods or solutions to address the problems posed." The winner will receive a scholarship of \$1,000.00 towards any type of higher education. The deadline is February 28, 2009, so start working on those essays!

## Safe-T-Cover

Safe-T-Cover has been producing freeze and vandal protective enclosures for backflow prevention assemblies for 20 years. We have 52 standard aluminum enclosure models. **Safe-T-Cover enclosures are made in Nashville, TN.** We ship many of our enclosures from "stock" within 1-2 days. All of our standard enclosure models meet the ASSE 1060 standard. Also, our efficient slab heaters are ETL certified to UL and CSA standards. Visit our website at [www.safe-t-cover.com](http://www.safe-t-cover.com) or call us at 1-800-245-6333.
