**TBPA Mission Statement**  
The mission of the Tennessee Backflow Prevention Association is to protect drinking water quality in the State of Tennessee by providing for education, statewide training, standardized certification, technical assistance and resources to our membership and the general public.

## President's Message

Hello everyone! I hope you all are doing well.

What a great time to be a member of the Tennessee Backflow Association. I just returned from the ABPA 25th Anniversary National Conference in Colorado Springs. It was a very good conference. It's hard to believe it's been that long since the first conference. When you get to be my age, time sure goes by fast! Start preparing now for the conference in New Orleans next year.

The Tennessee Backflow Conference Committee continues its work on the October conference in Tunica, MS. I know everyone will enjoy this year's conference and I encourage you to make plans now to attend. Please notice the date change to October 29th and 30th.

Kent Bowman and I just returned from the TAUD expo in Lebanon, TN where we set up a TBPA exhibit. We had a great day seeing old friends and making new ones. Our exhibit was well received by those in attendance with several people inquiring about TBPA.

I will not list all the events that have taken place recently with our association and around the state but simply urge everyone to read the exciting news in this newsletter. As usual, we have some very interesting and informative events. I wish everyone a safe and happy summer.

**REMEMBER TO BE AN ENCOURAGER TODAY NOT A DISCOURAGER!**

Larry Stinnett  
President TBPA

### Upcoming Events

**\*\*NOTICE DATE CHANGE\*\***

**TBPA 13th Annual Conference**  
October 29 & 30, 2009  
Harrah's Veranda Resort - Tunica, MS

## Nominations for Awards

The TBPA Board has updated the requirements to be nominated for one of the awards given annually for outstanding work in the organization and in the field of backflow. Hopefully, this will help in better understanding what persons would be eligible to receive one of these awards.

For all awards the nominee must be a member in good standing with TBPA as well as the following requirements:

- Individual Award:** Must have excelled in the last 12 months in the field of cross connection or the backflow industry.
- Individual Award:** Must have contributed outstanding work with the TBPA organization in the last 12 months.
- Company or Water Purveyor Award:** Must have excelled within the field of cross connection and promoted TBPA within the last 12 months.

If you know of someone who meets these requirements please use the form in this newsletter and nominate them for an

award. We are proud of our state and the contributions we have made to the field of backflow and want to always recognize the efforts of our outstanding members.

# Backflow Prevention Assembly Repair Class & Administration and Survey Classes

**Who:** Tennessee Backflow Prevention Association

**What:** 2009 Repair Classes & Administration and Survey Classes

**When:** November 2009 Date TBA later 8:00-4:00 Repair Class - Watts

**Where:** KUB - Knoxville, TN

**Contact:** Liba Ford at (731) 422-7517 or Lloyd Rainey at (800) 365-6154

### Some of the information presented:

- Double Check Valve Assemblies, Reduced Pressure Principle Assemblies, Vacuum Breakers
- Repair of varying device sizes from 3/4" to 4".
- Drawings and handouts available.
- Explanation of assemblies and parts used in repair
- Complete repair of devices and tools needed
- When to repair and when and what to replace
- Starting a Cross Connection Control Program
- Forms and documents for program administration
- Survey instructions and advice
- CD with all covered information
- Continuing Education Credits will be given

**Don't miss the opportunity to expand your knowledge on these valuable topics regarding CCC Programs and Assembly Repair.**

Classes are **FREE to TBPA Members**. Non-member cost is \$20 (non refundable). Class size may be limited therefore **registration is required**. Lunch will be provided for all Repair classes only. You may call or use the registration form below, indicating the class, section location and date you wish to attend.

## Administration & Survey Class and Repair Class REGISTRATION REQUIRED

**Only One Person and One Class per Registration Form**

Written registration is required for all classes. Complete the form below (printed or type written) and mail or fax to:  
Kitty Banks - TN American Water - 1101 Broad Street - Chattanooga, TN 37401

# TBPA Board Meeting Update - April 1, 2009

Welcome guest: Steve Betty

### Treasurer's Report

Balance \$17,207.31. This total includes the CD investment of \$5,100.00. Board approved the renewal of the CD for 6 months as in the previous year. Money will be added to interest earned to make even dollar amount.

### Board Meeting Time Change

The Board Meeting time was changed to 10:00 am.

### Award Criteria

The Board passed the following criteria for Annual TBPA Awards:

1. For all awards the nominee must be a member in good standing with TBPA
2. Individual Award: Must have excelled in the last 12 months in the field of cross connection or the backflow industry.
3. Individual Award: Must have contributed outstanding work within the TBPA organization in the last 12 months.
4. Company or Water Purveyor Award: Must have excelled within the field of cross connection and promoted TBPA within the last 12 months.

### Definition of Fire Service

Brent discussed the status of the bill to change the definition of Fire Service. It is in the Attorney Generals office awaiting his signature. From there it will go the Secretary of State where it will have to stay for 75 days. The earliest this will be enacted is mid June.

### TAUD

The Expo is May 14th at Lebanon Fair Grounds. Angel will supply a TBPA handout.

It was agreed to purchase TBPA letter openers as a give-away. Larry will purchase a leather man tool for a door prize (\$50) and an iPod for the silent auction. (not to exceed \$200) (Total for both purchases was \$191.16)

### 2009 ABPA Conference

Larry was given permission to purchase two nano iPods

**COMPACT BACKFLOW ASSEMBLY ENCLOSURES**

------------------------------------------------------------------------	--------------------------------------------------------------------------------------------------

(\$300) for the ABPA silent auction at conference. (He purchased an iPod and a speaker doc for a total of \$222.86)

### 2009 TBPA Conference

The 2009 TBPA Conference speakers were discussed. Several members were assigned speakers to pursue. Date was changed by email vote to October 29th-30th.

### Payments

Liba and Steve Betty will look into taking credit cards for TBPA through Pay-pal and report back to the Board.

### Corporate Memberships

The Board voted against accepting Corporate Memberships at this time.

### Training Class

Lloyd Rainey will conduct a repair class in Jackson on May 20th for Watts. Non-members will be charged \$20. Lloyd will see about CEU credits from Sherry at Fleming Training Center.

Kent and Wayne are scheduling classes in the fall.

## TBPA East Section News

On May 14th the TBPA had an exhibit at the TAUD Expo in Lebanon, TN. This was the first time TBPA had participated in this event. Larry Stinnett and I worked the TBPA exhibit and were very impressed with the great turnout. We heard the event had over 1,100 participants. It seemed as if everyone stopped by to gather information, receive a free letter opener and register for our door prize. Several people had questions about the backflow assemblies we had on display and obtained "hands on" information. The most asked questions were about the Watts 919 and the Wilkins 375.

I have several people I want to thank concerning this event. "Thank You" to Richard Goodman from Knoxville who is the East Tennessee Rep. for Watts and Febco with Mid America Marketing. Richard provided us with a cut away of the Watts 919 and the Febco 825Y.

"Thank You" to Johnnie Burns from Chattanooga who is the East Tennessee Rep. for Wilkins with Ben O'Neal Company for supplying the cut away of the Wilkins 975XL and the clear Wilkins 375. These two have always been ready to help in any way they are needed with TBPA and me personally. If anyone has any questions concerning backflow devices give them a call; I'm sure they will be happy to help.

"Thank You" to Lloyd Rainey from Memphis with Mid America Marketing and TBPA West TN Director.

"Thank You" to Brent Ogles with TAUD and TBPA Director at Large. Both these guys took the time to stop by the TBPA Exhibit to talk with attendees and answer questions.

The East TN Section will have a Watts repair class sometime in November 2009. We are still working on the details and plan to get a date set by mid-July. I will send out the information to everyone on my email list, post it in the Fall Newsletter and will have it available at the Conference. If anyone has any questions about the repair class you can reach me at (865) 966-9741 or email me at kbowman@fudknox.org. I hope everyone has a great and safe summer!

Kent Bowman  
East Tennessee Director

Larry Stinnett and Kent Bowman at the TBPA exhibit.

Isaac Bourne (left) receives the ABPA Scholarship Award from Denny Lowe.

## ABPA Scholarship Award Winner

TBPA wishes to congratulate Isaac Bourne, a graduating Senior at Jo Byrns School in Cedar Hill, Tennessee who was recently awarded the 2009 ABPA Harrington/Arthur Scholarship Award.

Isaac learned about the ABPA \$1,000 scholarship from Denny Lowe, the Adams-Cedar Hill Water System Cross Connection Coordinator. Denny presented a class about preventing backflows on the farm and around the house to students at Jo Byrns School. As a part of the application process, Isaac prepared an essay about a backflow prevention problem that he observed.

The ABPA scholarship competition was established to reward students who seek to increase their knowledge and understanding of how Cross Connection Control and Backflow Prevention helps ensure safe drinking water.

Lowe added, "Isaac Bourne is an outstanding student and deserves recognition."

Isaac is the son of Mark and Patty Bourne of Adams, TN and will be attending Freed-Hardeman University in Henderson, TN this fall as a freshman.

The TBPA Board would like to remind everyone that this scholarship is awarded annually and encourage the membership to promote this to eligible students in your area. We are especially proud to have a student from the great state of Tennessee win this award.

Lloyd Rainey joins Larry and Kent at the TAUD Expo.

## NOMINATION FOR TBPA AWARDS

Each year at the Annual Conference the Tennessee Backflow Prevention Association gives awards to a deserving company and persons who have contributed to the field of cross connection. All nominees must be a member in good standing of TBPA.

Please submit nominations for each category before September 26, 2009.

**#1.** A company or water purveyor that has done work within the field of cross connection and promoted TBPA within the past 12 months.

**#2.** A person that has done outstanding work within the cross connection program or the Backflow industry within the past 12 months.

**#3.** A person that has contributed outstanding work within the TBPA organization within the past 12 months.

This issue let's finish up by looking at Installation.

Manufacturers' installation instructions require that devices that have the potential to discharge water, not be installed where they can cause damage to the structure, this is a disclaimer and if the system is not properly installed the owner's insurance will not cover the damage, so be very careful what you recommend.

Should the RP be installed higher than 60 inches above finished floor, OSHA regulations come into play and OSHA requires that a permanent platform with a guard rail and ladder shall be provided.

The DCV devices, (ASSE 1015 & 1048), are recommended for installation on fire sprinkler systems, the reason being, fire sprinkler systems are static emergency systems, usually installed entirely within the structure with remotely operated valves extending to the out-of-doors. The system is for emergency use only with specific requirements for thermal expansion control. Since the system is static it becomes stagnant to the point that the water no longer react with the material composition of the pipe, but has no effect on the waters' ability to suppress a fire. Conversely if an RP is installed it will continually react to fluctuations in water main pressure, continuously causing the #1 check to admit water into the "zone", the #1 check will not open fully and will act as a strainer, trapping debris between the disk and seat causing the #1 check to fail prematurely, (remember strainers are not used on fire sprinkler systems). Also because the RP had a drain/vent, properly engineered drainage must be provided.

On the outlet side of the cross-connection control device a union of flange should be installed to facilitate removal without cutting into the plumbing system. Note: Providing all fittings are flanged type, no unions would be required, however threaded, glued or crimped joints require unions to facilitate repair and/or replacement.

Lastly, a full port outlet isolation valve should be installed to prevent the premises plumbing system from draining back to the work site.

The installation as described is the least expensive installation over the long haul. It provides for a safe work place for the people who must service the equipment. It precludes damage to the structure in the event of system failure. It provides security from tampering with the system, including water theft and theft of the components for scrap. Precludes the deed for "winterization", enclosures can be fitted with heating elements. It protects the system from the inadvertent contamination from chemicals used in the maintenance of the property. As an afterthought, provides a location for a name and address

for the premises.

Some self-predicating irrigation system people recommend removal of the back-flow devices for winterization. We must remember that they are breaking into a permitted and tested plumbing system, then hauling the devices off to who knows where then reinstalling them in the spring. Is this legal? I don't think so!

Come on people wake up and do your job, install and maintain your system correctly, in accordance with established standards, using approved material. You're not saving the customer anything if he/she has to replace damaged or pilfered equipment, or have your ugly mug starring them in the face with your hand out twice a year.

One thing ALL devices, appurtenances, appliances and apparatus intended to serve some special function, such as sterilization, distillation, processing, cooling, or storage of ice or foods, and that connect to the water supply system, require maintenance once a year, that includes testing if required, testing is not the end-all to your work. Cross-connection control people, sprinkler people, and whomever, that does any special work, let the plumbing professionals do their job and you can connect to the system without the worry of doing something wrong or worse getting someone killed.

Lloyd Rainey  
West Section Director

#### More West Section News

A Watts Repair School was held in Jackson, TN on May 20th. Twenty of the local plumbers and utility employees were in attendance. Lloyd Rainey provided valuable information on cross connections and demonstrated the repair of several different types of devices. The attendees were encouraged to ask questions and were able to put their hands on the devices to learn the correct procedure for repair. It was an informative day with a BBQ lunch provided by Watts.

The Watts Repair Class in Jackson was well attended.
